EDUCATION

Amal Jyothi College of Engineering Autonomous   Kottayam, India
Bachelor of Technology in Information Technology   *July 2022 – June 2026*

EXPERIENCE

Software Solutions Intern   July 2025 – Present
Lylux Lighting Equipment Trading LLC   *Dubai, UAE*
- Contributed to client-facing software tools using Supabase and ReactJS.
- Collaborated on UI/UX design improvements and backend service optimization.
- Engaged in real-world development tasks and software problem-solving as part of a remote freelance internship.

Full-Stack Developer Intern   July 2025 – Present
PeopleMaketh   *Bengaluru, India*
- Lead development of a secure code analysis tool using SAST platforms like SonarQube and Semgrep.
- Oversee full-stack implementation with secure APIs, database design, and scalable backend architecture.
- Automate CI/CD pipelines with GitHub Actions for integrated testing and vulnerability scans.
- Drive research and planning for future penetration testing capabilities and dynamic analysis tools.

PROJECTS

CareerWise | *Python, FastAPI, React, OpenAI API*   May 2025 – Present
- Developed an AI-based web app offering personalized career guidance through GPT-powered chat.
- Mapped user journeys for students, graduates, and professionals to deliver tailored insights.
- Integrated dynamic resources like scholarships, internships, and startup toolkits.
- Drove go-to-market efforts via pilot programs, B2B partnerships, and user engagement strategies.

E And S Decorations Website | *Python, FastAPI, React, Aceternity UI*   Jan. 2025 – June 2025
- Developed a responsive, SEO-optimized website for E And S Decorations to enhance their digital presence.
- Implemented a no-code admin dashboard for seamless content management.
- Added real-time update capabilities to galleries, services, and event showcases.

Lead Management System | *Java, JSP, Servlets, MySQL*   Dec. 2024 – Mar. 2025
- Developed a full-stack web application to help companies manage and track client leads across their sales pipeline.
- Implemented role-based access for administrators and agents, with lead assignment, status tracking, and follow-up.
- Designed scalable backend architecture using Servlets and MySQL for high performance and data integrity.
- Delivered a responsive user interface for seamless cross-device access.

TECHNICAL SKILLS

Languages: Python, Java, C, Dart, PHP, JavaScript, TypeScript
Frameworks: HTML, CSS, React, React Native, Node.js, Flutter, Flask, Django, FastAPI, Tailwind
Databases: MySQL, MongoDB, PostgreSQL
Design & Tools: Git, Docker, Pandas, NumPy, Postman, Matplotlib, Photoshop, InDesign, After Effects, Supabase

CERTIFICATIONS

Coursera – IBM: Python for Data Science, AI & Development
NIT – Cryptocurrency and Blockchain
IIT Kanpur – Self Driving Electric Vehicle

ADDITIONAL INFORMATION

Program Management: Resource Planning, Project Coordination, Stakeholder Communication, Agile Model
Languages Known: English, Hindi (Fluent), Malayalam (Native), Arabic, Tamil (Basic – Conversational)
